

Sir,

I found your work on the internet and am interested in "concept 357". I am an individual living in France, who has a fairly large collection of works of art by a Polish artist, Zdzislaw Beksinski. I would like to build a museum for them in Warsaw and your project 357 is what I am looking for. The realization of this museum is a distant thing, because for the moment I do not have sufficient financial resources. In addition, I am 80 years old and it will surely be my successors who will carry out this project.

However, I would still like to know during my lifetime if it is possible to obtain your consent to adopt your project and what would be the amount of your fees?

If in addition you are an architect, I would like to know if it was possible for you to reflect on this project as an architect and to this end start an exchange of ideas with me?

Sincerely yours

Piotr Dmochowski
